

## FITNESSGUM® CLEANING INSTRUCTIONS

### Prevention:

Use entrance mats in front of fitness areas and ensure that only clean sports shoes are used during training.

### Cleaning:

During cleaning, dust and dirt should be removed using a suitable vacuum cleaner. In most cases, stains can be removed simply by wiping the surface. Excessive use of water should be avoided, as moisture may penetrate the tiles. Acidic, acetone-based or chlorine-containing cleaning agents, as well as products containing turpentine, must not be used.

For regular maintenance cleaning, a mixture of water and a mild detergent can be applied. The same restrictions mentioned above apply to the detergent used. RZ Elastic Cleaning Care can also be used. If cleaning machines are applied, it is important to keep the rotational speed below 350 revolutions per minute.

For deep cleaning, RZ Intensive Cleaner can be used. It should be diluted with water at a ratio of 1:10 and applied according to the manufacturer's instructions. Afterwards, the surface should be thoroughly wiped with water. The process should be carried out efficiently, as water may potentially be absorbed into the tiles.
